

# Star Vac II

## The Ideal Solution for Easy Pool Cleaning

The **STAR STAR VAC II** is an entirely new robotic cleaner developed by Procopi in cooperation with the world's leading pool robotic cleaner manufacturer.

The combination of design, intelligent electronics and the best technology available makes this the ideal solution for easy pool cleaning.

Benefiting from 25 years' experience, we can guarantee this product for 2 years / 300 cycles.

### HIGH TECHNOLOGY

The STAR VAC II is designed for pools up to 80m<sup>3</sup>.

Its electronics have a complex algorithm to cope with all types of pool linings, shapes and sizes.

The filtration bags filter down to 2 microns — sand, leaves, debris . . . everything will be eaten up by the STAR VAC II. The powerful suction motor delivers 16m<sup>3</sup>/h.

### CLEVER

The STAR VAC II is equipped with the latest innovations:

If the cleaner mounts a beach or dry slope, it stops and reverses back into the water; If the cleaner runs dry, it stops automatically after 5 seconds; If it doesn't meet a wall within 90 seconds, it changes direction automatically.

### DESIGN

The STAR VAC II has 2 motors:

- High speed submersible drive motor,
- High efficiency submersible pump motor

The transformer 230V / 12V is conform to European Regulations and fitted with a safety emergency stop switch.
